SELIN TUNCAY
+1 (857) 465 9993 | selin.tuncay@tufts.edu

EDUCATION

Tufts University, Medford, MA — May 2027
Bachelor of Science in Computer Engineering; Minor in Computer Science — GPA: 3.49
Dean's List

Relevant Coursework: Real Time Embedded Systems, Computer Organization, Machine Structure & Assembly, Data Structures & Algorithms, Electronics & Circuits, Game Design, Security

TECHNICAL SKILLS

Languages: C++ | C | Python | C# | SQL | SystemVerilog
Tools & OS: Git | STM32 | Unity | RTOS | Azure DevOps | Render | Excel

EXPERIENCE

Data Engineering Intern | Ford Otosan — *Summer 2026*
- Developed Python tools to extract and standardize business glossary data for an enterprise data platform
- Built a reconciliation workflow to compare customer terminology with an Axon data catalog and identify missing, inconsistent, and review-based mappings
- Created automation tests and review-ready JSON outputs to improve data quality and support developer validation

AI Research Intern | Refabric (Remote) — *Summer 2025*
- Conducted web scraping and trend analysis to support AI-powered digital fashion workflows.
- Evaluated image-generation models and collaborated on ghost-mannequin and flat-garment pipelines.

Participant | Global Career Accelerator — *Summer 2026*
- Completed client-style projects spanning data analysis, UX research, prototyping, A/B testing, and digital campaign development.
- Translated business questions into data-informed recommendations and presented findings in cross-functional team settings.

Civic Life Ambassador | Tufts University — *2026 – Present*
- Planning campus events that encourage students to engage with their communities.
- Connect students with civic life resources and opportunities through outreach and collaboration

PROJECTS

Snowplow Race & Roger Williams – Game Design, Tufts University
- Built a 2D Unity puzzle game with a team of 3 and designed and developed a 2D Top-Down action game C#.

Systems Programming Projects – Tufts University
- Built an image compression/decompression program and a virtual-machine emulator, C.

Gaming Backlog – Personal Web Project
- Built a lightweight web application for organizing a personal game backlog and deployed a working prototype using render.

Theremin – Embedded Systems, Tufts University
- Programmed an STM32 microcontroller to convert distance-sensor readings into real-time changes in sound.

ATHLETICS

Tufts University Varsity Swimming & Diving Team | Captain — *2023 – Present*
- NCAA Division III All-American; contributed to second-place NESCAC and ninth place NCAA team finishes

Samsung Bosphorus Cross-Continental Swimmer – Women's 3rd, Award Winner — *2019 – Present*
